LANGUAGES

- English (Fluent)
- French (Advanced)

HOBBIES

- Movies & TV Shows
- Board games
- Social Media
- Coding
- Table Tennis
- Badminton
- Cycling
- Travel

PROFILE

Motivated CS student with strong interests in Web Apps, AI, and tech innovation. I'm trustworthy, reliable, open-minded, and a fast learner, adapt to any environment and tend to make connection with new people.

TECHNICAL SKILLS

- **Languages**: Python, Java, PHP, JavaScript/TypeScript, HTML/CSS
- **Frameworks**: React, Next.js, Express.js, FastAPI, Javalin, Tailwind CSS
- **Databases**: MySQL, PostgreSQL, Prisma ORM, SQLModel, Alembic, Redis
- **Tools**: Git, Github Actions, Vite, Nginx, Docker, VS Code, Vim
- **Deployment**: Vercel, Render, DigitalOcean

EDUCATION

Bachelor's in Computer Science — **September 2024 - December 2027 (expected)**

Université de Montréal (UdeM)

Montreal, QC, Canada

Certificate of English Proficiency — **September 2023 - December 2023**

International TEFL/TESOL Training Institute (ITTI)

Antananarivo, Madagascar

PERSONAL PROJECTS

CallSMoney — https://callsmoney.com — **November 2026 - Present (ongoing)**

Docker, FastAPI, Redis, Alembic, SQLModel (PostgreSQL), Next.js, Tailwind CSS

~~**WORK IN PROGRESS...**~~

NowSSpace — https://nowsspace-ui.onrender.com — **May 2026 - August 2026**

Docker, *FastAPI, Redis, Alembic, SQLModel (PostgreSQL), Next.js, Tailwind CSS*

- Created a real-time Synchronization Platform allowing users to to spend time together across any website with live activity (click, cursor, hover, page, scroll) tracking, and in-room chat using **WebSockets** and **Redis Pub/Sub**.
- Kept the platform fast and protected against spam by setting up **Rate Limiting** and **in-memory Caching** (**Redis**).
- Designed clean database models with **SQLModel** and managed schema updates seamlessly using **Alembic** (**PostgreSQL**) that handles database migration.
- Integrated **Gemini API** for an interactive assistant to explore how to use an external API.
- Built a user-friendly UI in **Next.js** and **Tailwind CSS** with a dynamic **English/French Language Change** and a persistent **Dark/Light Theme Switch**.
- Containerized the stack with **Docker** and automated staging and production releases using **GitHub Actions** (**CI/CD**).

NowSWorld — https://nowsworld-client.vercel.app — **February 2026 - June 2026**

React (Vite), TypeScript, Tailwind CSS, Express (Node.js), Prisma (PostgreSQL)

- Built a **PWA** (Progressive Web App) using **React** (Vite) and **Express** (Node.js) with **TypeScript.**
- Designed a responsive UI using **Tailwind CSS** (mobile-first).
- Implemented **RESTful Endpoints** with a modular route structure to handle CRUD operations.
- Modeled a relational database schema using **Prisma ORM** to perform CRUD operations without raw SQL queries.
- Set up browser **Push Notifications** using **Service Workers.**
- Integrated **MailerSend API** to handle user feedback submission via email.
- Set up a secure **OAuth 2.0** authentication (**Google** & **Facebook**) with **JWT** stored in **HTTP-only cookies.**
- Deployed the application on a **DigitalOcean server** (**Ubuntu**) using **PM2** for process management.
- Configured **Nginx** as a reverse proxy to route user requests to the server with a secure HTTPS routing (**Let's Encrypt**).

PERSONAL PROJECTS

Portfolio

https://ryanmacwaykit.com
React (Vite), TypeScript, TailwindCSS

January 2026 - Present (on hold)

- Scaled a **React** (Vite) + **TypeScript** open-source project using a modular component structure.
- Improved UX with **Toast Notifications** to provide users with immediate feedback.
- Integrated **EmailJS** for a direct client-side email communication in the contact form.
- Personalized the portfolio with my own **Personal Information**.

WORK EXPERIENCE

Web Developer
MICKAEL Company
Mananjary, Madagascar

https://mickaelone.com/test/index.php?source=resume
HTML, CSS, JS, PHP, MySQL

September 2022 - December 2025

I was just a beginner in Web Development at that time when I first started working on this work-related project but for my next personal projects, I'll be using frameworks such as **Next.js** for the frontend and **FastAPI** for the backend, along with other technologies and tools such as **Docker** for containerizing applications and **ORM** for interacting with an SQL database.

- Designed a Full-Stack Web App using **PHP** (server-side) and **MySQL** (relational database).
- Developed a **REST-like Endpoints** to handle CRUD operations.
- Implemented a **Secure Authentication** and **Role-based Access Control.**
- Prevented **SQL Injection** using prepared statements.
- Reduced page reloads using **AJAX** by fetching data from the server.
- Managed the application deployment on a **Hostinger Server** for any updates.
